---

## EDUCATION

---

### LBS Institute Of Technology For Women

*Bachelor of Technology in Computer Science*

*2022-2026*

CGPA: 8.0 **L'ecole Chempaka School**

Grade XII (ISC) 90.0%, Grade X (ICSE) 97.2%

## SKILLS SUMMARY

---

**Languages:** Java, C++, C, JavaScript

**Frameworks:** Flutter, Riverpod

**Tools:** Git, GitHub, MySQL, NodeJS

**Platforms:** LINUX

**Soft Skills:**

## EXPERIENCE

---

### Kesan's Software Solutions

*Application Development Intern*

*May 2025 - Jul 2024*

- Developed a mobile application for Kanak Books using Flutter and Dart
- Built a POS Fast Billing module with repository methods and payload schema
- Integrated PDF rendering for invoices/bills via secure API endpoints

### Google Developer Groups (GDG on Campus)

*Technical Lead*

*Jul 2024 - Present*

- Led a team of 10+ members and assigned roles for GDG events
- Collaborated with Google Developer experts to promote Google Developer tools
- Updated the college chapter website using HTML, CSS, and JavaScript

## PROJECTS

---

### Remote Patient Cardiovascular Monitoring App

A mobile app to track cardiovascular health using real-time ECG data *Tech:* Flutter, Firebase Realtime DB

- Developed a remote patient monitoring dashboard with alerting and data visualization
- Implemented role-based access for doctors and patients

### Mini-Leet: Leet Code Revision & Tracker Chrome Extension

A Chrome extension for Leet Code revision using spaced repetition *Tech:* JavaScript, HTML, CSS, GraphQL

- Deployed and published the extension on the Chrome Web Store
- Integrated Google OAuth for user login and implemented revision queue logic

## **Load-Balancer- using Node.js**

A fully functional load balancer to distribute incoming network traffic *Tech:* NodeJS, Shell-Script

- Implemented load distribution using Round-Robin and Least-Connections algorithms
- Added server health and monitoring with automatic removal of unhealthy servers
